— Preharvest interval information not provided on label.

§Potentially acceptable in certified organic programs

## 17.2 EPA numbers and worker protection standard re-entry and personal protective equipment (PPE) guidelines.

**Worker Notification:** Under most circumstances, worker employers must make sure that workers are notified about areas where pesticide applications are taking place or where restricted-entry intervals are in effect. Some pesticide labels require you to notify workers BOTH orally AND with signs posted at entrances to the treated area. Unless the pesticide labeling requires both types of notification, notify workers EITHER orally OR by the posting of warning signs at entrances to treated areas. You must inform workers which method of notification is being used. For details on notification requirements both for these products and those not represented below, refer to the product label and the Worker Protection Standard, 40 CFR part 170.

**Key:**

- a..... Long-sleeved shirt & long pants  
b..... Waterproof gloves  
c..... Shoes plus socks  
d..... Coveralls over short-sleeved shirt & short pants  
e..... Coveralls over long-sleeved shirt & long pants  
f..... Chemical-resistant gloves; refer to label for specifics  
g..... Chemical-resistant footwear & socks  
h..... Protective eyewear  
i..... Chemical-resistant apron when cleaning equipment, mixing or loading  
j..... Chemical-resistant headgear for overhead exposure  
k..... Coveralls  
l..... Dust/mist filtering respirator (MSHA/NIOSH approval no. prefix TC-21C)  
m..... Respirator with either an organic vapor-removing cartridge with a pre-filter approved for pesticides (MSHA/NIOSH approval no. prefix TC-23C) or a canister for pesticides (MSHA/NIOSH approval no. prefix TC-14G)

- n..... Face shield for mixing and loading  
o..... Dust/mist filtering respirator (NIOSH approved) with any N, R, P or HE filter  
p..... Dust/mist filtering respirator meeting NIOSH standards of at least N-95, R-95, and P-95  
q..... NIOSH approved respirator with any R, P, or HE filter  
PPE..... Personal protective equipment  
REI..... Re-entry interval  
(E)..... Refer to label for details of restricted entry interval  
psthvst..... Post-harvest use only  
§..... Potentially acceptable in certified organic programs  
\*..... Restricted-use pesticide; may be purchased and used only by certified applicators, or used by someone under the supervision of a certified applicator.

**17.3 Spray Mixture Compatibility Notes**

Read the label for specific crops or situations. Compatibilities may be changed by certain adjuvants, different formulations, combinations of more than two materials, and environmental factors such as temperature and humidity.

- Unless otherwise noted on the label, use soon after mixing, preferably in systems with continuous agitation.
- Physical compatibility: Although there may be no chemical incompatibility between the active ingredients of 2 given pesticides, some formulations of these products may not be physically compatible. This is particularly true when mixing at high concentrations and when mixing wettable powders with emulsifiable concentrates. It is recommended that a small batch of a proposed mixture be prepared before making tank

combinations, to check for unacceptable physical reactions.

**17.3.1 Suggested Mixing Sequence**

Always mix different spray materials in the following order, starting with:

- water soluble bags (WS)
- water dispersible granules and dry flowables (WDG, DF)
- wettable powders (WP)
- liquid flowables (L, F, FC)
- sprayable concentrates (S, SC, LC)
- emulsifiable concentrates (EC)
- surfactants, oils, and adjuvants Do not add oils, surfactants, or emulsifiable concentrates prior to dry formulations, or lumping may occur.

## 17.7 Abbreviations and Symbols Used in this Publication

### Formulations

a.e.	acid equivalent
A	acre
AI	active ingredient
AS	aqueous solution
CS	capsule suspension
D	dust
DF	dry flowable
DG	dispersible granule
E, EW	emulsion, emulsifiable
EC	emulsifiable concentrate
E.U.P.	Experimental Use Permit
F, FL	flowable
FC	flowable concentrate
FM	flowable microencapsulated
G	granular
L	liquid
LC	liquid concentrate
P	pellets
PHI	preharvest interval
S	sprayable
SC	suspension concentrate
SG	soluble granule
SP	soluble powder
SS	soluble salt
ULV	ultralow volume
W	wettable
WBC	water-based concentrate
WDG, WG	water dispersible granules
WS	water soluble packets
WP	wettable powder

### Product-Specific Symbols

*	restricted-use pesticide; may be purchased and used only by certified applicators, or used by someone under the supervision of a certified applicator.
#	2(ee) recommendation based on an efficacy statement
##	2(ee) recommendation based on quantitative efficacy data
§	potentially acceptable in certified organic programs
(§)	not all formulations of the active ingredient are acceptable in certified organic programs

### PHI (Pre-Harvest Interval) and REI (Restricted Entry Interval) Abbreviations

BL	Do not apply beyond bloom
DD	Delayed dormant application
GT	Do not apply beyond green tip
HIG	Do not apply beyond 1/2-in. green
PB	Prebloom applications only
PF	Do not apply beyond petal fall
PH	Postharvest applications allowed
SS	Do not apply beyond shuck split
2C	Do not apply after 2d cover spray
(A)	Depends on rate, method or number of applications; refer to label for more details
(B)	Nonbearing trees only
(C)	Tart cherries only
(D)	Restricted entry interval: 96 hr (peaches), 72 hr (apples), 48 hr (pears)
(E)	Refer to label for details of restricted entry interval
(F)	Sweet cherries only
(G)	Refer to label for details on timing of application

Codes for personal protective gear shown under table 17.2 for REI requirements.
