

ORGANIZATION OF THIS GUIDE.....	VI
1 INTEGRATED CROP AND PEST MANAGEMENT	1
1.1 Introduction	1
1.2 Practicing IPM	1
1.3 Components of IPM	2
1.4 IPM Tactics	3
2 ORGANIC TREE FRUIT PRODUCTION IN NEW ENGLAND.....	4
2.1 Introduction	4
2.2 What is Organic Agriculture?.....	4
2.3 Fungicide/Bactericide Options in Organic Apple Production	5
2.4 Insecticide Options in Organic Apple Production	7
2.5 Organic Apple Production Resources:	8
3 PESTICIDE INFORMATION.....	9
3.1 Pesticide Classification and Certification.....	9
3.2 Use Pesticides Safely	9
3.3 Protect Honey Bees from Insecticides.....	10
3.4 Verifying Pesticide Registration and Restricted-Use Status	10
3.5 Pesticide Recordkeeping/Reporting	10
3.6 Reduced-Risk Pesticides, Minimum-Risk Pesticides, and Biopesticides.....	10
3.7 FIFRA 2(ee) Recommendations.....	11
3.8 Prepare for Emergencies	11
3.9 Organophosphate Poisoning.....	11
3.10 Your Responsibility as a Pesticide User.....	12
3.11 Field Use and Care of Respirators.....	12
3.12 Acute Toxicity of Pesticide	12
3.13 Label Compliance	13
3.14 Protecting Water Quality.....	13
3.15 Restricted Entry Interval	13
3.16 Pesticide Residue Tolerances.....	13
3.17 EPA Worker Protection Standard.....	13
3.18 OSHA Hazard Communications Standard.....	15
4 SPRAYER INFORMATION	16
4.1 Solutions for Safer Spraying	16
4.2 Minimizing Pesticide Drift.....	17
4.3 Preparing an Air Blast Sprayer.....	20
4.4 Sprayer Calibration	21
4.5 Nozzle Information	24
4.6 Selecting Airblast Sprayer Nozzles.....	24
4.7 Calibrating Airblast Sprayers	24
4.8 Orchard Weed Control Equipment.....	27
4.9 Selecting Nozzles for Boom Sprayers.....	29
4.10 Boom Sprayer Calibration.....	30
4.11 Mixing Procedures	31
4.12 Cleaning Sprayers	34
4.13 Mechanical Maintenance.....	37
4.14 Sprayer Storage	37
4.15 Homeland Security.....	37
5 CHARACTERISTICS OF CROP PROTECTANTS USED ON TREE FRUITS.....	38
5.1 Cross Reference of Chemical vs. Trade Names of Pesticides	38
5.1.1 By Common Name.....	38
5.1.2 By Trade Name	39
5.2 Restricted Highly Toxic Pesticides	42
5.3 Fungicides	42
5.4 Bactericides.....	48
5.5 Other Materials.....	49
5.6 Insecticides.....	49

5 CHARACTERISTICS OF CROP PROTECTANTS USED ON TREE FRUITS (<i>continued</i>)	
5.7 Acaricides	56
5.8 Fumigants and Nematicides for Tree Fruits	58
6 DISEASE MANAGEMENT	60
6.1 Apple Scab Fungicides	60
6.2 Notes on Apple Scab Management	64
7 INSECT AND MITE MANAGEMENT	70
8 WEED MANAGEMENT	93
8.1 Calibration to Ensure Correct Herbicide Rate	93
8.2 Groundcover Management	94
8.3 Herbicides and Their Use	95
8.4 Herbicides for Tree Fruits	98
9 WILDLIFE DAMAGE MANAGEMENT	112
9.1 Deer and Rabbits	112
9.2 Meadow and Pine Voles	112
9.3 Woodchucks	113
9.4 Beavers	113
9.5 Birds	114
10 NUTRIENT MANAGEMENT OF APPLE ORCHARDS	115
10.1 Introduction	115
10.2 Soil Analysis	115
10.3 Preplant Soil Preparation	115
10.4 Fertilization Program for Young Trees	118
10.5 Fertilization Program for Established Orchards	118
10.6 Characteristics of Commonly Available Fertilizers	121
11 APPLES	124
11.1 Insecticides and Fungicides for Apples	124
11.2 Apple Disease Notes	155
11.2.1 Apple Rust Diseases	155
11.2.2 Apple Scab	155
11.2.3 Black Rot & White Rot	157
11.2.4 Blister Spot	157
11.2.5 Blossom End Rot	157
11.2.6 Cedar Apple Rust	157
11.2.7 Crown Rot (Collar Rot)	158
11.2.8 Fire Blight	158
11.2.9 Powdery Mildew	162
11.2.10 Sooty Blotch and Fly Speck	162
11.3 Apple Insect and Mite Notes	163
11.3.1 American Plum Borer	163
11.3.2 Apple Aphid, Spirea Aphid	163
11.3.3 Apple Maggot	163
11.3.4 Apple Rust Mite	163
11.3.5 Climbing Cutworms: Dark-sided, Dingy, Mottled, Spotted, Variegated	163
11.3.6 Codling Moth	163
11.3.7 Comstock Mealybug	164
11.3.8 Dogwood Borer	165
11.3.9 European Apple Sawfly	165
11.3.10 European Corn Borer	165
11.3.11 European Fruit Lecanium	165
11.3.12 European Red Mite	165
11.3.13 Green Fruitworms	166
11.3.14 Japanese Beetle	166
11.3.15 Lesser Appleworm	166
11.3.16 Mullein Plant Bug	167
11.3.17 Obliquebanded Leafroller	167

11 APPLES (continued)	
11.3 Apple Insect and Mite Notes	
11.3.18 Oriental Fruit Moth	168
11.3.19 Oystershell Scale	168
11.3.20 Plum Curculio	168
11.3.21 Redbanded Leafroller	169
11.3.22 Rosy Apple Aphid	169
11.3.23 San Jose Scale	169
11.3.24 Spotted Tentiform Leafminer, Apple Blotch Leafminer	170
11.3.25 Spotted Wing Drosophila	170
11.3.26 Stink Bugs (including Brown Marmorated Stink Bug)	171
11.3.27 Tarnished Plant Bug	171
11.3.28 Variegated Leafroller, Sparganothis Fruitworm	171
11.3.29 White Apple Leafhopper, Potato Leafhopper	171
11.3.30 Woolly Apple Aphid	172
11.4 Storage Disorders	172
11.4.1 Storage Rots	172
11.4.2 Storage Scald	172
11.4.3 Senescent Breakdown (McIntosh)	173
11.5 Notes on Scald Control	173
11.5.1 Materials	173
11.5.2 Application Equipment	173
11.5.3 Variety Requirements	173
11.6 Growth Regulator Use In Apples	173
11.6.1 Chemical Thinning	173
11.6.2 Weather Factors That Affect Thinning Response	173
11.6.3 Tree Factors That Affect Thinning Response	174
11.6.4 Chemicals Registered for Thinning in New England	175
11.6.5 Chemicals Not Registered for Thinning that Influence Cropload	176
11.6.6 Spray Timings	176
11.6.7 Suggested Strategies for New England Growers	177
11.6.8 Summary	177
11.7 Other Growth Regulator Uses In Apples	183
11.7.1 Growth Regulator Chemicals Registered in New England	183
12 PEARS	188
12.1 Insecticides and Fungicides for Pears	188
12.2 Pear Disease Notes	197
12.2.1 Fabraea Leaf Spot	197
12.2.2 Fire Blight	197
12.2.3 Pear Scab	199
12.2.4 Sooty Blotch	199
12.3 Pear Insect and Mite Notes	199
12.3.1 Aphids, Including Spirea Aphid	199
12.3.2 Brown Marmorated Stink Bug – refer to section 12.3.15 Stink Bugs	199
12.3.3 Codling Moth	199
12.3.4 Comstock Mealybug	200
12.3.5 European Red Mite, Twospotted Spider Mite	200
12.3.6 Green Fruitworms	200
12.3.7 Obliquebanded Leafroller	200
12.3.8 Pear Midge	201
12.3.9 Pear Psylla	201
12.3.10 Pear Rust Mite	201
12.3.11 Pearleaf Blister Mite	202
12.3.12 Plum Curculio	202
12.3.13 Redbanded Leafroller	202
12.3.14 Spotted Wing Drosophila	202
12.3.15 Stink Bugs (including Brown Marmorated Stink Bug)	202
12.3.16 Tarnished Plant Bug, Pear Plant Bug	203

12 PEARS (continued)	
12.3 Pear Insect and Mite Notes (continued)	
12.3.17 San Jose Scale.....	203
12.4 Growth Regulation of Pears.....	203
13 CHERRIES	206
13.1 Insecticides and Fungicides for Cherries.....	206
13.2 Cherry Disease Notes.....	214
13.2.1 Bacterial Canker (<i>Pseudomonas syringae</i>).....	214
13.2.2 Black Knot.....	215
13.2.3 Brown Rot (Blossom & Shoot Blight).....	215
13.2.4 Leaf Spot.....	215
13.2.5 Phytophthora Root, Crown, and Collar Rots.....	216
13.2.6 Powdery Mildew.....	216
13.2.7 X-Disease.....	216
13.3 Cherry Insect and Mite Notes.....	216
13.3.1 American Plum Borer.....	216
13.3.2 Black Cherry Aphid.....	216
13.3.3 Black Cherry Fruit Fly, Cherry Fruit Fly.....	216
13.3.4 Brown Marmorated Stink Bug – refer to section 13.3.12 Stink Bugs.....	217
13.3.5 European Red Mite.....	217
13.3.6 Japanese Beetle.....	217
13.3.7 Lesser Peachtree Borer.....	217
13.3.8 Obliquebanded Leafroller.....	217
13.3.9 Plum Curculio.....	218
13.3.10 Scales, including European Lecanium and San Jose Scale.....	218
13.3.11 Spotted Wing Drosophila.....	218
13.3.12 Stink Bugs (including Brown Marmorated Stink Bug).....	218
13.4 Storage Rot Notes.....	219
13.5 Growth Regulation of Cherries.....	219
14 PEACHES AND NECTARINES	221
14.1 Insecticides and Fungicides for Peaches and Nectarines.....	221
14.2 Diseases.....	230
14.2.1 Bacterial Spot.....	230
14.2.2 Brown Rot (Blossom Blight).....	231
14.2.3 Peach Leaf Curl.....	231
14.2.4 Peach Scab.....	231
14.2.5 Perennial (Cytospora, Valsa) Canker.....	231
14.2.6 Phytophthora Root, Crown, and Collar Rots.....	232
14.2.7 Powdery Mildew (Rusty Spot).....	232
14.2.8 Prunus Stem Pitting Virus.....	232
14.2.9 X-Disease.....	232
14.3 Insects and Mites.....	232
14.3.1 American Plum Borer.....	232
14.3.2 Brown Marmorated Stink Bug.....	233
14.3.3 Cottony Peach Scale, European Fruit Lecanium Scale, San Jose Scale.....	233
14.3.4 European Red Mite.....	233
14.3.5 Green Peach Aphid.....	233
14.3.6 Japanese Beetle.....	233
14.3.7 Obliquebanded Leafroller.....	233
14.3.8 Oriental Fruit Moth.....	233
14.3.9 Peachtree Borers (Including Lesser Peachtree Borer).....	234
14.3.10 Plum Curculio.....	234
14.3.11 Spotted Wing Drosophila.....	235
14.3.12 Stink Bugs (including Brown Marmorated Stink Bug).....	235
14.3.13 Tarnished Plant Bug.....	235
14.3.14 Western Flower Thrips.....	236
14.4 Storage Rots.....	236
14.5 Growth Regulation of Peaches and Nectarines.....	236

15 APRICOTS	237
15.1 Insecticides and Fungicides for Apricots	237
Table 15.1.1. Pesticide Spray Table – Apricots	237
15.2 Diseases.....	242
15.2.1 Bacterial Canker (<i>Pseudomonas syringae</i>)	242
15.2.2 Bacterial Spot (<i>Xanthomonas arboricola</i> pv. <i>pruni</i>)	242
15.2.3 Brown Rot	242
15.2.4 Peach Scab	243
15.2.5 Perennial (Cytospora, Valsa) Canker	243
15.2.6 Phytophthora Root, Crown, and Collar Rots.....	243
15.3 Insects and Mites.....	243
15.3.1 Brown Marmorated Stink Bug – refer to section on Stink Bugs.....	243
15.3.2 European Red Mite, Twospotted Spider Mite.....	243
15.3.3 Japanese Beetle	243
15.3.4 Oriental Fruit Moth	244
15.3.5 Peachtree Borers (including Lesser peachtree borer).....	244
15.3.6 Plum Curculio	244
15.3.7 Scales, including European Lecanium and San Jose Scale	245
15.3.8 Spotted Wing Drosophila.....	245
15.3.9 Stink Bugs (including Brown Marmorated Stink Bug).....	245
15.3.10 Tarnished Plant Bug.....	245
15.3.11 Western Flower Thrips.....	246
15.4 Storage Rots	246
15.5 Growth Regulation of Apricots	246
16 PLUMS AND PRUNES	248
16.1 Insecticides and Fungicides for Plums and Prunes.....	248
16.2 Diseases.....	253
16.2.1 Bacterial Spot (<i>Xanthomonas arboricola</i> pv. <i>pruni</i>)	253
16.2.2 Black Knot	253
16.2.3 Brown Rot.....	253
16.2.4 Peach Scab	253
16.2.5 Perennial (cytospora, valsa) Canker.....	254
16.2.6 Phytophthora Root and Crown Rots.....	254
16.3 Insects and Mites.....	254
16.3.1 Apple Maggot	254
16.3.2 Brown Marmorated Stink Bug – refer to section on Stink bugs	254
16.3.3 European Fruit Lecanium Scale	254
16.3.4 European Red Mite, Twospotted Spider Mite.....	254
16.3.5 Japanese Beetle	254
16.3.6 Lesser Peachtree Borer, Peachtree Borer, American Plum Borer	254
16.3.7 Oriental Fruit Moth	255
16.3.8 Plum Curculio	255
16.3.9 Redbanded Leafroller.....	255
16.3.10 Scales, including European Lecanium and San Jose Scale	256
16.3.11 Spotted Wing Drosophila.....	256
16.3.12 Stink Bugs (including Brown Marmorated Stink Bug).....	256
16.4 Storage Rots	256
16.5 Growth Regulation of Plums and Prunes	257
17 APPENDICES	258
17.1 Pesticide Data.....	258
17.2 EPA numbers and worker protection standard re-entry and personal protective equipment (PPE) guidelines.....	265
17.3 Spray Mixture Compatibility Notes	270
17.4. Tree Fruit Reference Materials.....	271
17.5 Diagnostic and Analytical Services.....	273
17.6 Extension Faculty and Staff	274

Organization of this Guide

The first chapters of this guide contain introductory information about two different, but not mutually exclusive, management approaches – integrated pest management (IPM) and organic. This is followed by general information on pesticide safety, sprayer use and calibration, and descriptions of the different materials used for pest management in tree fruits. Chapters are in the following order:

Integrated Pest Management
Organic Management
Safe and Legal Use of Pesticides
Effective Spraying
Characteristics of Crop Protectants

Following this are sections on managing diseases, insects and mites, weeds, and nutrient management and fertilizer recommendations for apple orchards.

Next, for each crop, is a section on *General Pest Management Considerations*. Each crop chapter begins with a Pesticide Spray Table, which lists specific products for the control of each disease, insect and mite pest of this crop, giving products (alphabetically by trade name), rates, re-entry and pre-harvest intervals, and comments keyed to specific sections of the written notes in the preceding *General Pest Management Considerations*. Additionally for apples, pears, and cherries, IRAC and FRAC resistance management codes and efficacy ratings are provided for each product. For each phenological growth and management stage of the crop, pests are addressed in the order of diseases followed by insect and mite pests. Within each pest group, individual pests are listed in alphabetical order. In some cases not every brand name pesticide product with the same active ingredient on the market is listed, and instead representative product(s) for that active ingredient are listed with a note that other products with the same active ingredient are available.

The spray table is followed by general pest management considerations. This section contains numbered comments keyed to the spray table on biology, cultural notes, monitoring, and pesticide use for each pest, in the following order:

CROP

Diseases

Disease 1

Biology & Timing
 Monitoring & Forecasting
 Biological & Cultural Management
 Pesticide Application Notes
 Pesticide Resistance

Disease 2, etc.

Insects and Mites

Insect 1, Etc.

Within each group (Diseases, Insects and Mites) pest are discussed in alphabetical order.

Lastly is an appendix of tables showing pesticide active ingredient common names, preharvest intervals, pesticide product brand names, EPA registration numbers, Restricted Entry Intervals, Personal Protective Equipment guidelines, and spray mixture compatibility suggestions for the materials included in this publication. This is followed by a list of other fruit reference publications, and directories of diagnostic services, Extension faculty and staff in each New England state.

The last page provides a key to the abbreviations and footnotes used in this publication.
