What is Apple Tracker?

Apple Tracker is a record keeping and orchard management software system that helps growers keep accurate records for:

- . Food and Worker Safety
- . Pest Management
- . Crop Production
- . Reporting and Audit Compliance

It is in the cloud and continuously evolving to meet industry needs.

... driven by grower input and technological change since 2006...

Apple Tracker – Roadmap

- Ontario Apple Growers (OAG) began the project as a Spray Record keeping desktop application in 2006.
- It was a joint project between the OAG, Ontario Ministry of Food and Rural Affairs (OMAFRA), Agricorp and Dragonfly IT.
- February 2012 system moved online for the OAG and Grape Growers of Ontario (GGO).

Apple Tracker – Roadmap

- February 2012 launch included the following new modules:
 - Harvest
 - Shipping and Storage Modules
 - Publication 360 Recommendations Integration
 - Email and SMS push notifications for PHI and REI
 - Chemical Labels Integrated from the Health Canada

Apple Tracker – Roadmap

- February 2013 launched Integrated iPad app for Scouting
