Comments some external browned areas; brown rot in fruit in tops of trees; over-cropped, but still not bad; we should be growing more; just at start of harvest, larger fruit definitely mature; selling for \$5 for 8 peaches (app. 1.5 qt.)

Comments prominent suture; not the best looking this year for whatever reason; despite light crop, fruit has seemed small; although this peach has good flavor, there are many better looking peaches in this season, such as PF-14 Jersey, Blazing Star, etc.
